

# Let's jump start the process

If you want to fast track the process for the patient, you can help do so by letting us help move lead the charge to get the steps moving the through

## So, what can you do to help us push this process?

We will need the following items to sent over to us to begin:

### **Demographics Sheet of the Patient** ☐

Needs to include

Patient Name / Patient Address / Patient Phone Number / Patient Height and Weight  
Patient Insurance (primary and secondary) / Secondary Contact

### **The last 6-10 visits of chart notes** ☐

This allows us to make sure we have the proper documentation to support the need and help set the expectation to the patient on what will and won't be covered. If anything needs to be addressed, we can do so earlier in the process to prevent delays.

### **Prescription for a PMD** ☐

This allows us to ensure the insurance company that the PCP initiated the process

### **PT/OT Evaluation Prescription** ☐

Please fill out the back of this form and we can help find a PT/OT that is trained and understands the insurance requirements to complete the Mobility Evaluation

### **\*Face-to-Face Examination** ☐

\*This may not be completed yet and we will help you set it up if needed based on the chart notes provided
